Sample Problems from Math Kangaroo 2008 Bing

To give an idea of the contest's difficulty and style, here are some representative problems from the 2008 edition:

Sample Problem 1: (Level 3)

If a number is divisible by 3 and by 4, then it is divisible by:

- A) 6
- B) 12
- C) 24
- D) 36

Solution: Since the number is divisible by both 3 and 4, it must be divisible by their least common multiple, which is 12. Therefore, the correct answer is B) 12.

Sample Problem 2: (Level 4)

A sequence of numbers starts with 2, and each subsequent term is obtained by multiplying the previous term by 2. What is the 5th term in the sequence?

Solution: The sequence is 2, 4, 8, 16, 32. The 5th term is 32.

Sample Problem 3: (Level 5)

In a class of 30 students, each student shakes hands with every other student exactly once. How many handshakes occur in total?

Solution: The total number of handshakes is the combination of 30 students taken 2 at a time: C(30, 2) = (30 × 29) / 2 = 435.

These problems exemplify the range of difficulty and the emphasis on logical reasoning typical of the contest.
